

Environment Policy

Crown House Technologies is committed to the protection and enhancement of the environment. Environmentally sustainable performance is an ongoing priority to be achieved by adhering to this policy, which is operated in conjunction with our Sustainable Development, Biodiversity, Carbon Management and Responsible Sourcing policies.

We will meet our environmental responsibilities by implementing and maintaining an Environmental Management System (EMS). The EMS applies to services provided by the Company's permanent offices and its design, construction and manufacturing activities. This includes activities, products and services provided by organisations working on behalf of Crown House Technologies.

It is Crown House Technologies objective to:

- Continually strive to improve the environmentally sustainable performance of its activities, products and services.
- Comply with environmental legislation and any other environmental requirements which apply to its activities, products and services, and regularly assess adherence to these.
- Proactively seek to minimise the environmental impact of its activities, products and services.
- Reduce waste and improve resource efficiency.
- Reduce water consumption and improve water efficiency.
- Endeavour to eliminate the production of polluting emissions or discharges into the environment.
- Take proactive measures to enhance, protect and preserve wildlife and flora, and their natural habitats.
- Set objectives, targets and programmes, and review and revise them regularly with the aim of continual improvement in environmental sustainability performance.

The achievement of these objectives shall be supported through iGATE (the Group's online integrated business management system) which complies with ISO 14001:2004. The effectiveness of iGATE shall be enhanced by:

- Programme presentations/communications;
- Employee training and instruction in sound environmental practice;
- Maintaining registration to ISO 14001:2004 for its principal Construction businesses and progressively seeking registration for business units not currently holding ISO 14001.

Crown House Technologies will participate in open consultation with interested stakeholders and ensure effective communication of this policy to all those working for and on behalf of the Company.

R G O'Rourke
