

Sustainable Development Policy

Crown House Technologies is committed to the practical principles of sustainability. It is our policy to integrate and balance social, environmental and economic considerations with the goal of building a better quality of life for all stakeholders and raising standards for the industry as a whole.

It is Crown House Technologies objective to:

- Minimise our environmental impact through prudent and efficient use of resources on all our operations and in the products and services we provide.
- Enhance the natural environment, wherever possible.
- Consider the needs of all stakeholders and ensure our actions affect them positively.
- Effectively demonstrate that the Company adheres to a strict code of corporate ethics and takes responsibility for its actions.
- Be an example of social progress.
- Promote the skills of our industry to future generations to ensure we have a large, well-qualified base of potential employees.
- Provide and construct safe, healthy and productive environments.

Crown House Technologies will seek to further these objectives through its operating procedures and practices, and will give additional impetus to its commitment through its Corporate Responsibility Challenge.
